## Quick USB Start Guide

The USB media player is available by selecting the Audio Video tab from the Home screen of the Land Rover Head Unit and the DC tab

If there is no USB media device connected to the USB connector the screen shows "No Media" mid-screen message

When USB flash media is connected the device is loading the content and the screen shows "Loading" before start playing

When media is found the player is indexing the folders and the screen shows "Scanning ..." for short time before start playing

To change songs press SEEK+ or SEEK- from the head unit panel. The song name will update and the song will start playing immediately

To change directories on the disk press < or > from the mid screen display. The directory will change and the first song name will display

Pressing CD features button the screen will show options for playing the songs, random, repeat or scan
